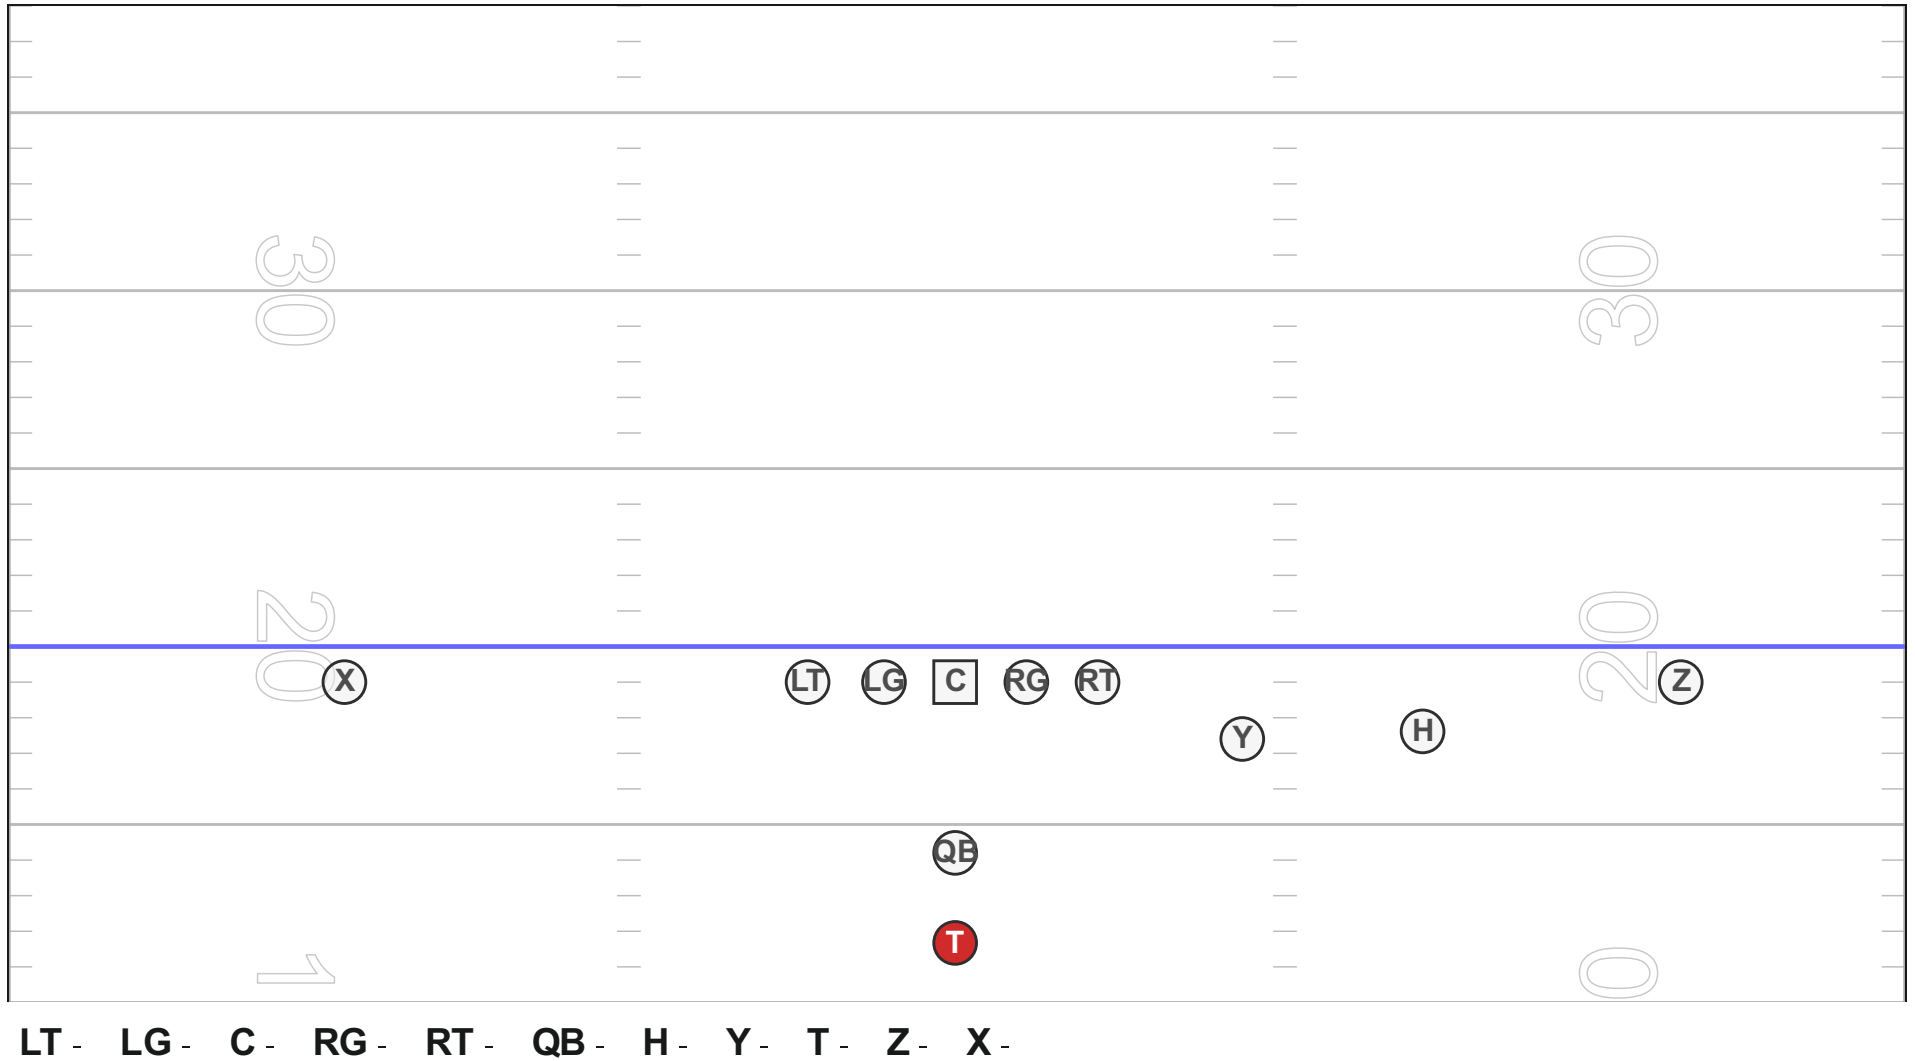

Diagram illustrating a 1D lattice system with 10 sites. The sites are labeled from left to right: LT, LG, C, RG, RT, H, QB, Y, T, X, Z. The lattice is divided into two halves by a vertical dashed line. The left half contains sites 1 through 5, and the right half contains sites 6 through 10. The sites are occupied by particles: Z (fermion) at site 1, H (fermion) at site 2, Y (fermion) at site 3, LT (boson) at site 4, LG (boson) at site 5, C (boson) at site 6, RG (boson) at site 7, RT (boson) at site 8, X (fermion) at site 9, and 0 (fermion) at site 10. A blue line is drawn across the middle of the lattice, passing through the center of the sites. The bottom of the diagram is labeled with site indices: LT - LG - C - RG - RT - H - QB - Y - T - X - Z -.

UTAH RED 60 SMASH vs 4-2-5
